Contract Lifecycle Management (CLM) Assessment

integreon

If you don't know where you are, how do you know where you are going?

Having an efficient Contract Lifecycle Management (CLM) function increases corporate efficiency, saves time and money, and helps you to remain competitive. So, how can you be certain your CLM approach is going in the right direction?

Assessing Your CLM Function

Integreon's CLM Assessment enables you to determine the current state of your contracting function and provides actionable recommendations for achieving a more efficient future state. Our CLM experts assess the maturity of your contracting system and strategy today and provide a roadmap to achieving a better-in-class function, considering budget, time, and appetite for change.

Under Developed → Developing → Efficient → Best-in-Class

Integreon's team of CLM experts have deep expertise in process re-engineering and technology tools, design, and implementation. We focus on key actionable areas including:

• Legal Coverage and Risk Mitigation
• Resourcing Strategy
• Metrics (including cost to contract)
• Operations and Infrastructure
• Technology

Global team of contract management specialists, technologists, project managers and Six Sigma experts engaged in reengineering and provisioning of optimized contract lifecycle management services

Benefits of an Integreon CLM Function Assessment include:

- Faster response time by eliminating bottle-necks

- Improved risk mitigation - when responding to regulations, legal provisions, and breaches

- Cost savings through more effective resource allocation

- Better understanding and application of AI and CLM technology

- Template and playbook harmonization and globalization

- Development of contracts technology roadmap

- Institution of key performance metrics

- Retention of best in class talent by increasing job satisfaction and overall efficiency

Integreon 3-Step Contract Lifecycle Management Assessment

Our experts partner with you step-by-step to take an in-depth look at your current contracting function, identify and analyze gaps, and make recommendations on how to achieve a best-in-class future state.

Scoping, Discovery & Other Preparatory Work	- Project Planning - Initial Interviews - Develop project plan and timeline
Review & Analysis of Current Contracting Processes and Existing Technology	- Interview key stakeholders to understand current status - Map, assess and document current state process maturity, complexity, and address challenges
Review State Assessment & Recommendations	- Review gaps and identify improvement opportunities - Conduct stakeholder workshops around future state goals - Develop future state (including technology) road map - Discuss findings and finalize recommendations
