

# Law Enforcement Requests

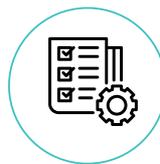

Each internet search, online purchase, email communication, or social media post could potentially become the unintended subject of lawsuits or law enforcement investigations.

The more data we create, the more it is subject to request. For the companies that store this data, they have the additional burden of responding to third-party subpoena and law enforcement requests and often find themselves under a tremendous backlog with no end in sight.

Keeping pace with increasing law enforcement requests requires access to a global solution that addresses:

**The intense response deadlines which differ by country**

**The nuances of international response requirements to ensure compliance**

**Foreign language support**

**Quick and accurate searching of multiple data sources**

**Ability to meet staffing needs as volumes increase**

Integreon's years of experience providing smart process-and-resource driven solutions enable us to address this legal challenge.

Our Subpoena Processing and Compliance Service (SPC) helps organizations establish an approach to eliminate their growing backlog and manage incoming and future law enforcement requests. For organizations able to charge a processing fee, compliance could go from an operational budget strain to a cost-neutral or revenue-generating activity

## What We Can Do:

Integreon's dedicated team of subject matter experts will develop a custom plan that includes:

- Review of your current processes using a Six Sigma, efficiency-based analysis
- Comprehensive set of recommendations to improve efficiency and speed, while reducing costs which can include:
  - Dedicated team globally to respond to client record requests
  - Workflows/process maps to provide consistent and accurate execution while minimizing risks
  - Metrics and dashboards to provide transparency into third-party subpoena volumes, costs, and income
- Flexible delivery support model to drive process-and-cost efficiency and speed
- Documented SLA-driven processes managed by Integreon to ensure quality and on-time delivery of client deliverables
- Major processes governed by detailed documentation, including workflows, standard operating procedures, roles and responsibilities, and exception / issue monitoring
- Triage and/or production of law enforcement requests and delivery to requesting party
- Integration with technology to track collection, review, QC, redaction, and production of responsive data

Give your product launch the Integreon advantage.
